

Sorted Union

```
graph LR; A[Sorted Union] --- B[return array with unique values]; A --- C[put everything in one array with concat(...arr)]; A --- D[for loop to add values to res array if res array does not include them];
```

A mind map with a central node 'Sorted Union' connected to three peripheral nodes. The top node is red, the middle is orange, and the bottom is green. The background features a light gray dashed grid and several 'XMind:ZEN Trial Mode' watermarks.

return array with unique values

put everything in one array with
concat(...arr)

for loop to add values to res array
if res array does not include them
